

FROGBIT

PondAcademy.com

 Full sun to partial shade

 Roots 20" long, leaves 2.5" wide

 Summer

 USDA 4-10

 Floating plant

Care Tips

Prune or trim the leaves and flowers of the plant once they start turning brown or yellow. Detach and discard the pruned parts completely to minimize the amount of excess organic material in your pond or water garden. Frogbit does not require fertilization. Optimal water temp range between 64 and 86-degrees F. Keep the pH of your pond water between 6.0 and 8.0. If you live in Zones 5 or lower, discard the Frogbit plants at the end of the first frost.
