

HORSETAIL

PondAcademy.com

Full Sun to partial shade

Size - Grow up to 4+ feet tall

Remains green year round

USDA 4-12

Bog plant

Care Tips

The larger part of the horsetail plant stays green irrespective of the weather or season. That said, it is recommended to detach old stems that have browned, died, and dried out. This will help to preserve the aesthetic values of the plant. You should also note that Horsetail Rush can be aggressive and spread extensively when planted in the soil close to a stream or pond. Horsetail is cold tolerant – they are hardy in zones 4-12.
