

RED LUDWIGIA

PondAcademy.com

Full sun

Size - Grow up to 36"

Spring to Fall

USDA Zone 5 - 11

Marginal/submerged plant

Care Tips

Ludwigia is easy to care for if it receives ample sunlight and nutrients from the pond's water. It does grow very quickly if these conditions are met, so be sure to trim the plant regularly and remove any clippings away from the water. To overwinter Ludwigia in colder climates, you can take the plants indoors and allow them to grow in an aquarium or tub (ensure they get ample light). Or simply allow them to die off and replant in Spring.
