

# WATERCRESS

PondAcademy.com

Full sun to partial shade

Size - 6 to 24" high

Blooms Spring to late Fall

USDA 6-11

Aquatic or semi-aquatic plant

## Care Tips

Considering the rapid growth and spread of this aquatic plant, it is best to trim them back to avoid overgrowth. Ensure the clippings and fallen flowers and leaves are removed from your pond. You will notice a loss of foliage as Autumn approaches. The remaining parts of the plant will overwinter and resprout when Spring approaches. In milder regions they will likely continue their flowering/fruiting cycle, especially when temps stay above 50° F (10° C).
